PROFESSIONAL SUMMARY

Pre-final year B.Tech AI & ML engineer with internship experience in AI/DS and Deep Learning, skilled in Python, machine learning, and deploying deep learning models. Proven through internships, SIH 2025 Finals and Top-4 finish at IIT Bombay CTD International Hackathon.

SKILLS

Languages

Python (Primary), Java, JavaScript, SQL

AI/ML & Data

Machine Learning, Deep Learning, Computer Vision, NLP, LLMs, RAG, TensorFlow, PyTorch, OpenCV, Scikit-learn, ONNX

Data & Stats

Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Statistical Analysis

Frameworks

Flask, FastAPI, Node.js, Fast MCP

Databases

MongoDB (Certified), MySQL, PostgreSQL, SQLite, ChromaDB

Tools & Platforms

Docker, REST APIs, Render, Railway, Firebase, Git/GitHub

Soft Skills

Problem-Solving, Teamwork, Communication, Agile Collaboration

CERTIFICATIONS & AWARDS

MongoDB Node.js Associate Developer

MongoDB University, December 1st, 2024

Generative AI with Diffusion Models

NVIDIA, September 1st, 2025

Fundamentals of MCP

Hugging Face, January 2026

Create Your First Gemini Enterprise Application

Google, May 2026

SIH 2025 National Finalist

Smart India Hackathon, December 2025

Top 4 Finalist

CTAI International Hackathon, IIT Bombay, October 2025

Finalist — AI Summit 2026 Buildathon (HCL & GUVI)

HCL/GUVI, February 2026

AREAS OF INTEREST

- Machine Learning & Deep Learning
- Natural Language Processing
- Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Agentic AI & AI Systems

EXPERIENCE

AI / Data Science Intern

Twincord Technologies

July 2025 – October 2025

- Deployed FastAPI ML inference endpoints; monitored latency and optimized scalability of AI platform.
- Collaborated with senior developers on algorithm implementation, model validation, and troubleshooting.

Deep Learning Intern

Shinelogics

March 2025 – May 2025

- Trained CNN models (ResNet, EfficientNet, MobileNet) on GPU; benchmarked inference latency vs. accuracy.

Backend Developer Intern

ZEONE

November 2024 – January 2025

- Built RESTful APIs in Node.js/Express for an AI chatbot; optimized data pipelines and reduced API latency.

PROJECTS

Fabric Defect Detection System - SIH 2025 Finals

Tech: Python, TensorFlow, CNN, OpenCV, Flask, IOT Integration

December 2025

- Delivered real-time AI defect detection system with hardware integration and dataset pipeline for a production textile factory environment at SIH 2025 Finals.

Fruit & Vegetable Identifier — Agri-Vision AI

Tech: Python, Flask, CNN (ResNet/EfficientNet/MobileNet), ONNX Runtime, Local GPU Development

May 2025

- Built a real-time produce recognition system using Flask, LLM-based visual inference, and image embeddings to classify fruits/vegetables — directly applicable to agri-tech quality-control workflows.

ClauseWise

AI Legal Document Analyzer | Tech: Python, IBM Granite LLM, Ollama, OCR, FAISS, RAG

September 2026

- Built an RAG based assistant supporting OCR on scanned documents, for clause and document classification
- Implemented vector-based Q&A system with FAISS embeddings; processed XML/JSON structured data pipelines for entity extraction via REST API endpoints.

ResumeForge- MCP-Based NLP Resume Pipeline

Tech: Python, MCP agents, NLP, RAG, FastMCP, LLM

April 2026

- Built and published my **first open-source project**, an MCP-based pipeline aggregating LinkedIn, GitHub, and LeetCode data to generate ATS-optimized resumes using own built MCP servers.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

Kongu Engineering College, Erode

May, 2027

- CGPA: 8.49
